

Warranty Coverage

Overview

MTS builds some of the most rugged and reliable testing equipment on the market. We also stand behind our products and services with extensive warranty options. In addition to providing standard warranty coverage on new equipment and service parts, MTS offers optional extended warranties for equipment and components to help ensure your equipment is ready for testing when you need it.

Standard Warranty – Equipment

MTS warrants its equipment to be free from defects in material and workmanship under normal use, given proper installation and maintenance, for 12 months from the date of shipment of your product. Defective equipment may be repaired or replaced at MTS' option.

Standard Warranty – Parts & Services

Warranty periods for service products start with the product shipment from MTS. Replacement, exchange, remanufacture, or repair of a system component does not extend the warranty coverage of the entire system. Coverage on system components is as follows:

PURCHASED PARTS

- » Parts with a model number 12 months
- » Parts without a model number 90 days

EXCHANGE, REMANUFACTURE OR REPAIR PROGRAMS

- » Exchange 12 months
- » Remanufacture 12 months
- » Repair 90 days

OTHER SERVICES

- » Factory calibrations 90 days
- » Field calibrations 90 days
- » Field service repair 90 days

be certain.

Extended Warranty

An Extended Warranty is available for purchase as part of an MTS Service Plan. Under this plan option, MTS will troubleshoot and repair or replace your failed equipment and/or components during a 12-month plan period.

An Extended Warranty is designed to help protect you from incurring unplanned material and labor expenses and includes the following:

- » Labor to troubleshoot and repair equipment
- » Parts to repair equipment
- » Exchange, remanufacture or repair as authorized by MTS

It is easy to add coverage for your entire laboratory, or for only a portion of your MTS equipment.

Extended Warranty Coverage

CONTROLLERS

- » MTS FlexTest® 40
- » MTS FlexTest 60
